

SODIUM COMMUNITY SURF APP

QUICK START GUIDE - V12

Surf with your friends, not your feed.

1

Open your private invite

Your invite opens the correct Sodium location.

2

Sign in once

Google is easiest; email also works.

3

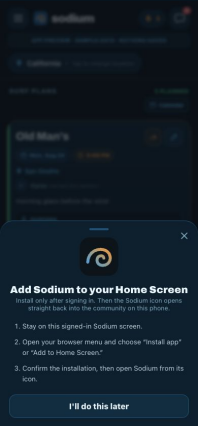

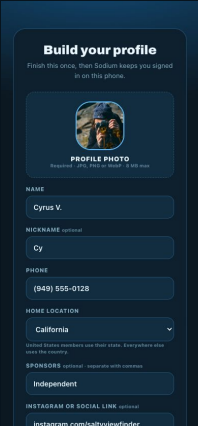

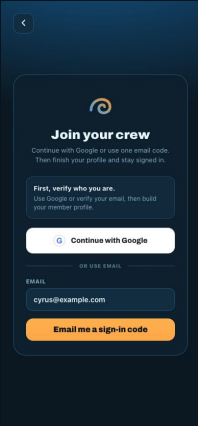

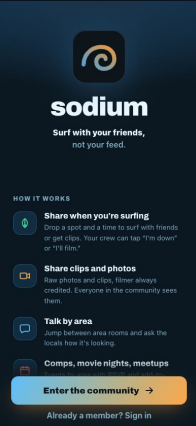

Finish your profile

Add your photo, name, and home location.

4

Install after sign-in

Add Sodium to your Home Screen.

Choose the crew. Make the plan.

Your home is a U.S. state or a country. Join travel locations when the crew reaches somewhere new.

SESSIONS HOME

- 1

Pick a location
Sessions, Chat, Events, and notifications follow the location you choose.
- 2

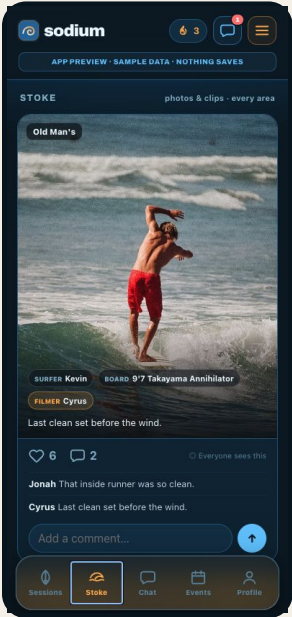

Create or join
Choose surfing or filming, add the place and time, or join an existing plan.
- 3

Add the crew
Type a name to find real members. A plain name still works before a friend joins.
- 4

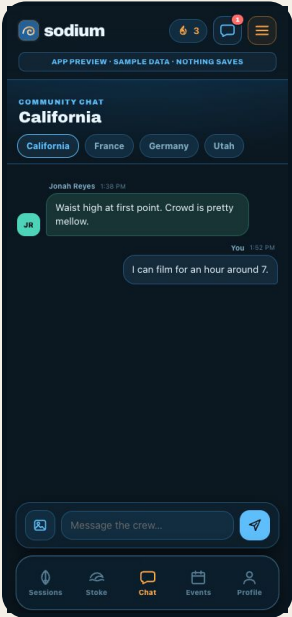

Start, stop, or forward
Orange cards are future plans; green cards are in the water. Play starts, Stop finishes, Share forwards, and the pencil edits or cancels.

Keep the crew moving.

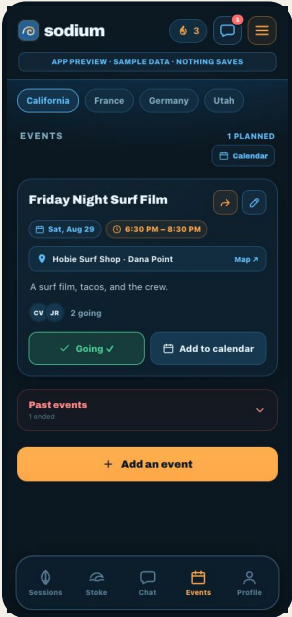

Stoke holds the media. Chat holds the conversation. Events get everyone to the same place.

STOKE

COMMUNITY CHAT

EVENTS

1

Stoke

Share photos or clips up to 90 seconds / 50 MB. Credit the filmer; add the board brand, model, and dimensions. You can edit or delete your post.

2

Community Chat + DMs

Community Chat is regional text plus photos. DMs are private and text-only.

3

Events

Comps, movie nights, and meetups include map location, RSVP, calendar, and creator editing.

4

Crew calendar

One calendar shows both upcoming Sessions and Events for the area you selected.

Simple rule: media in Stoke, plans in Sessions.

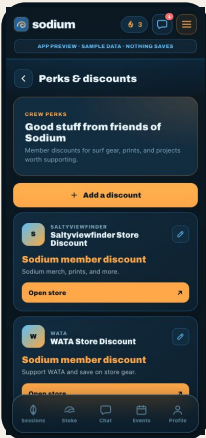

Chat when you need to coordinate. Events are for the bigger stuff.

Participate. Support the homies.

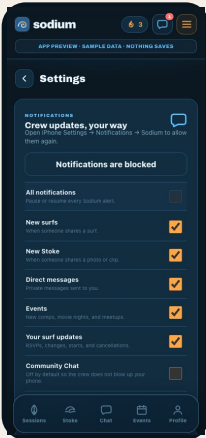

Profiles track completed participation. Marketplace shows what members make or do, with every transaction happening directly with them.

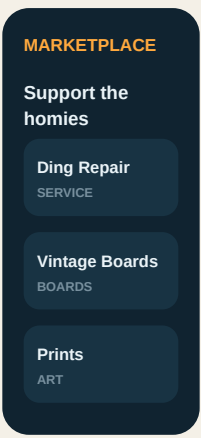

POINTS

PERKS

SETTINGS

POINTS + STREAKS

- 15 Share a photo or clip
- 10 Finish a surf you organized
- 10 RSVP to an event
- 5 Surf or film when a session finishes
- 3 Leave a useful comment
- +5 First activity of the day

NOTIFICATIONS

On by default: new Sessions, Stoke, DMs, Events, and your session updates. Community Chat is off by default. Change everything in Settings.

1

Invite your actual crew

Invites carry the location you are viewing. Invite a friend + guide sends this PDF too.

2

Marketplace + perks

Marketplace is what members make or do. Tap View to visit them directly; Sodium has no cart, checkout, price field, or commission. Community perks stay separate.

3

If anything feels weird

Use Report an issue in Settings. Add a screenshot and what you expected; it goes to the private admin dashboard.

That's it. Post a Session. Join one.
Drop some Stoke. Go surfing.
